# ABOUT BODYVINE

The brand name BodyVine is derived from observations of the natural mutualistic relationship between vines and trees. The image of a vine wrapped around the trunk of a tree is representative of the way the BodyVine's Power-band taping technology has been applied to human body on targeted muscles and tendons for advanced compression and support.

The Vine-like Power-band Compression Tapings of BodyVine use thin, flexible, but strong elastomeric materials. In combination with the knowledge of the biomechanics, and the theory of sports tapings, BodyVine creates several kinds of taping technique that can be applied to garments and braces to compress and support specific body parts in activities. The result is reducing unnecessary vibration and disruption of target tendons and muscles, but yet promoting blood circulation of the body parts more precisely and effectively. Wearer can reduce the fatigue experienced from work or exercise, enhance physical performance, and minimize the risk of injury. Flexi-Gel is also incorporated in the design of specific products to provide extra relief of the pressure, swelling and pain from injury while encouraging the recovery of the body.

At BodyVine, we believe actively pursuing health and vitality is an attitude as well as a lifestyle. BodyVine aims to provide products that can be worn regularly at exercise and daily life and help modern individuals to make the most of their passion in an easier way. The vision we desire to convey to our clients is-- Bodyvine wants to help you develop "Your Lifestyle of Health"

BodyVine

## Triple Compression Wear Series with COOLMAX ALL SEASON

### Product features

- Targeted zone support by Triple Compression Technology.
- **Power-Band™** Silicone Compression Taping Target Compression for extra support, stability and increases proprioception during movement.
- **ALL SEASON** TECHNOLOGY BY **COOLMAX®** COOLMAX® ALL SEASON fabric technology keeps you cool and dry on hot days and warmer on cold days.
- Reduces vibration of active muscles and enhances exercise endurance.
- 3D construction, for a comfortable fit.
- Designed for training, high performance and recovery.
- **UPF 50+** Sun Protection UPF50<sup>+</sup> sun protection.

## Triple Compression Technology

2

### Power-Band™

Power-Band™ tapings are made of a unique and very elastic silicone formula. Provides extra and targeted compression and support and increases proprioception during movement.

1

### All-day Comfort Wicking Fabric

Provides gentle and fundamental compression.

3

### Power-Mesh

Provides breathable and restrained compression.

# TRIPLE COMPRESSION SUPPORTS

-With Power-Band Muscle Support Taping-

## Power-Band™

Silicone Compression Taping

Provides extra and target compression to knee joint and increases proprioception during movement.

Triple Compression

## BreathGrip™

Anti-slip silicone tech

Anti-slip pattern grips the target muscles and tendons.

Fabric Swatch

Only 0.04 mm thick

No more red and itching anti-slip marks on the skin.

## TRIPLE-COMPRESSION

**1 Bottom layer : All-day comfort wicking fabric**  
Provide gentle and fundamental compression.

**2 Middle layer : Power-Band™ Silicone taping**  
Provide extra and targeted compression.  
Increase proprioception during movement.

**3 Top layer : Power Mesh**  
Provide breathable and restrained compression.

## TRIPLE-COMPRESSION THIGH SLEEVE

-With Power-Band Muscle Support Taping-

### FEATURE

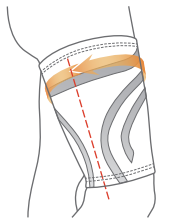

- Patented three-layer compression pattern sandwiches built-in *Power-Band™* compression tapings.
- The bottom layer : All-day comfort and wicking fabric to provide gentle and fundamental compression to the thigh.
- The middle layer : Built-in *Power-Band™* silicone taping provides thigh muscles and Iliotibial band with extra and targeted compression and support. Also gives better track to Iliotibial band and increases proprioception during movement.
- Reduce vibration of active muscles and enhance exercise endurance and performance.
- The top layer : Elastic *Power-Mesh* material to provide breathable and restrained compression to the overall thigh support.
- *Power-Mesh* gives a unique look to the product.
- 3D cutting makes the sleeve comfortable to wear and gives a sharp fit and neat look to the leg.
- Aids in high performance and rapid recovery.
- Decrease thigh pain symptoms.
- Easy to slip on and off.
- Fit discreetly under clothing.
- Sun protection UPF 50+

### FOR

Sports performance, training and protection. General thigh & lateral knee pain, recovery and prevent re-injury.

### SPECIFICATION

Code	CT-N13515	CT-N13516	
Color	Gray	Blue	
S	42 - 46CM		
M	46 - 50CM		
L	50 - 54CM		
XL	54 - 58CM

## TRIPLE-COMPRESSION CALF SLEEVE

-With Power-Band Muscle Support Taping-

### FEATURE

- Patented three-layer compression pattern sandwiches built-in *Power-Band™* compression tapings.
- The bottom layer : All-day comfort and wicking fabric to provide gentle and fundamental compression to the calf.
- The middle layer : Built-in *Power-Band™* silicone taping, which is made of a unique and very elastic silicone formula, provides calf muscles and Achilles tendon with extra and targeted compression and support, and also increases proprioception during movement.
- Provides support to medial and lateral muscle groups including tibialis posterior and peroneus muscles.
- The top layer : Elastic *Power-Mesh* material to provide breathable and restrained compression to the overall calf sleeve.
- *Power-Mesh* gives a unique look to the product.
- 3D cutting makes the sleeve comfortable to wear and gives a sharp fit and neat look to the leg.
- Reduce vibration of active muscles and enhance exercise endurance and performance.
- Aids in high performance and rapid recovery.
- Decrease calf pain symptoms.
- Easy to slip on and off.
- Fit discreetly under clothing.
- Sun protection UPF 50+

### FOR

Sports performance, training and protection. General Calf pain, recovery and prevent re-injury.

# TRIPLE-COMPRESSION KNEE STABILIZER

-With Power-Band Compression Taping-

## FEATURE

- Patented three-layer compression pattern sandwiches built-in *Power-Band*™ compression tapings.
- The bottom layer : All-day comfort and wicking fabric to provide gentle and fundamental compression to the knee.
- The middle layer : Built-in *Power-Band*™ taping to provide extra and targeted compression to knee joint and increases proprioception during movement.
- *Power-Band*™ designed to cover upper portion of calf and help reduce muscle vibrations.
- The top layer : Elastic *Power-Mesh* material to provide breathable and restrained compression to the overall knee support.
- *Power-Mesh* gives a unique look to the product.
- *BreathGrip*™ silicone anti-slip pattern effectively stops the sleeve from sliding, leaves skin with no mark, and stimulates the proprioception at the contact muscles and tendons.
- 3D cutting makes the sleeve comfortable to wear and gives a sharp fit and neat look to the leg.
- Provides knee joint support/stability with enough freedom of knee movement.
- Aids in high performance and rapid recovery.
- Decrease knee pain symptoms.
- Easy to slip on and off.
- Fit discreetly under clothing.
- Sun protection UPF 50+

## FOR

Sports performance, training and protection. General knee pain, recovery and prevent re-injury.

# TRIPLE-COMPRESSION ELBOW STABILIZER

-Adjustable / With Power-Band Compression Taping-

## FEATURE

- Patented three-layer compression pattern sandwiches built-in *Power-Band*™ compression tapings.
- The bottom layer : All-day comfort and wicking fabric to provide gentle and fundamental compression to the elbow.
- The middle layer : Built-in *Power-Band*™ taping to provide extra and targeted compression to elbow joint and increases proprioception during movement.
- The top layer : Elastic *Power-Mesh* material to provide breathable and restrained compression to the overall elbow support.
- *Power-Mesh* gives a unique look to the product.
- *Power-Band*™ compression strap provides adjustable pressure and support to relieve pains related to tennis/golf elbow.
- 3D cutting makes the sleeve comfortable to wear.
- Provides elbow joint support/stability with enough freedom of movement.
- Aids in high performance and rapid recovery.
- Decrease elbow pain symptoms.
- Easy to slip on and off.
- Fit discreetly under clothing.
- Sun protection UPF 50+

## FOR

Sports performance, training and protection. General elbow pain, recovery and prevent re-injury.

# TRIPLE-COMPRESSION WRIST STABILIZER-PLUS

-Adjustable / With Power-Band Compression Taping-

## FEATURE

- Patented three-layer compression pattern sandwiches built-in *Power-Band*™ compression tapings.
- *Power-Mesh* gives a unique look to the product.
- Provides wrist joint support/stability with enough freedom of movement.
- Aids in high performance and rapid recovery.
- Wrap design offers adjustable compression and individualized support.
- The bottom layer is an all-day comfort and wicking fabric.
- The middle layer : Built-in *Power-Band*™ taping gives extra compression and support.
- The top layer : Elastic *Power-Mesh* material to provide breathable and restrained compression to the overall wrist support.
- *Power-Band*™ compression wrap supports the muscles and tendons to relieve pain with stable support.
- Decrease wrist pain symptoms.
- Easy to slip on and off.
- Fit discreetly under clothing.
- Sun protection UPF 50+

## FOR

Sports performance, training and protection. General wrist pain, recovery and prevent re-injury.

## Targeted Compression For Optimal Performance

# ***OTHERS***

-Compression Taping / Adjustable-

# Elastic Knee Stabilizer

-With Compression Tapings- (Extra Side Stability)

## FEATURE

- Build-in compression tapings to help stabilize knee joint.
- Target compression tapings enhance patella tracking and side by side stability.
- The elastic fabric provides comfortable circumferential compression and warmth around the knee joint.
- Super elastic and breathable knit material for full range of knee movement and all-day comfort.
- Fit discreetly under clothing.

## FOR

Knee injury, pain, recovery and prevent re-injury.  
Perfect for moderate exercise to prevent related knee injuries, such as patella instability, patellofemoral pain syndrome, mild arthritis, tendonitis, sprain or strain.

# PowerWrap Tennis / Golf Elbow Strap

-Double Support-

## FEATURE

- Designed specially to provide comfortable, firm, and adjustable support to relieve the pains of tennis/golf elbow.
- Anatomically shaped silicone pressure pad applies target compression at the extensor muscles.
- An adjustable strap delivers a customized fit.
- Compression strap is made of *Bodyvine's Silprene™* material, a low profile but strong and elastic silicone sandwiched material.
- *Silprene™* strap provides double support to the extensor muscles with additional and adjustable compression.
- Main body is made of the highest grade closed cell neoprene for comfortable compression and heat retention. Latex free.
- Fits left or right.

### LATERAL

Medial and lateral compression pads to reduce common elbow pain such as tennis elbow or golf elbow.

### MEDIAL

## FOR

Pain relief from Tennis Elbow (Lateral Epicondylitis) or Golfer's Elbow (Medial Epicondylitis).

Power-Wrap™

## SPECIFICATION

# PowerWrap Patella Strap

-Double Support-

## FEATURE

- Designed specially to provide comfortable, firm, and adjustable support to relieve knee pain related to patellar tendonitis (runner's/jumper's knee).
- Anatomically shaped silicone pressure pad applies target compression at the patellar tendon.
- Adjustable hook and loop closure for custom fit.
- Compression strap is made of *Bodyvine's Silprene™* material, a low profile but strong and elastic silicone sandwiched material.
- *Silprene™* strap provides double support to the patella tendon with additional and adjustable compression.
- Main body is made of the highest grade closed cell neoprene for comfortable compression and heat retention. Latex free.
- No irritating hard buckle used.
- Fits left or right.

Provides double support to the patellar tendon with additional and adjustable compression to enhance stability and reduce pain.
